

Design System Palette Guide

Extracted Color Specification File for "My Stream" Dashboard

This document contains the core visual design assets extracted from your project layout code. These keys can be referenced as native CSS variables or integrated directly into design components to maintain consistent branding.

1. Core Color Swatches

 Brand Accent #1ed760 Vibrant green used for logos, interactive highlights, status accents, and badges.	 Main Canvas #121212 Primary application canvas background. Deep low-contrast neutral.	 Surface Elevation #181818 Elevated container layers such as content cards, lists, and sidebar panels.
 UI Borders / Base #282828 Used for structuring structural dividers, section borders, and badge body bases.	 Text Muted #b3b3b3 Secondary typography system color allocated for links, artists, and descriptions.	 Text Primary #ffffff High contrast pure white for primary titles, header labels, and interactive hover highlights.

2. Mapping Token Specification

Variable Token	Hex Code	Target Selectors	Functional UI Mapping Role
--brand-green	 #1ed760	.logo, .plays-badge	Signifies brand identity, metrics text, and key focus callouts.
--bg-main	 #121212	body	Applies structural base layer background color across layout frames.
--bg-surface	 #181818	.sidebar, .song-card	Creates optical elevation depth separation for component shapes.
--border-ui	 #282828	.nav, .song-card	

Variable Token	Hex Code	Target Selectors	Functional UI Mapping Role
			Handles clean box borders and hairline dividers separating content.
--text-primary	 #ffffff	h1, h2, a :hover	High-visibility emphasis tier assigned to headers and hovered elements.
--text-secondary	 #b3b3b3	.artist, .nav-links a	Low-emphasis hierarchy tier balancing dense text structures.
--bg-nav	 #000000	.nav	Deep grounding zone anchor background specialized for modern menus.
